# SOC Lite-as-a-Service

Complete 360 Degrees of Managed Cybersecurity.

## MONITORING & CONTROL | PREVENTION & DETECTION | RESPONSE ORCHESTRATION

- Do you want to protect your business and data, as well as meet compliance requirements?
- Looking for a trusted MSSP with the tools and know-how to monitor your IT environment 24/7?
- Do you want protection from internal and external threats, malware, phishing, ransomware, and the people behind it to keep you safe?

## MULTIPLE SILOED TECHNOLOGIES

As a security leader, it is your responsibility to address the multitude of legacy and advanced threats that are targeting your enterprise daily. Most organizations struggle with:

- Disparate Point Coverage
- Overly Complicated Systems
- Hard Deployment
- Lack Of Time & Resources
- Implementing Too Many Systems
- Gaps In Coverage
- High Operating Costs

## 24/7 MANAGED SECURITY AND SOC

**VT Cyber SOC Lite-as-a-Service** combines the technologies, processes, and people in a comprehensive service offering that addresses all attack surfaces.

### Next-Gen Antivirus

Automated prevention of malware, exploits, fileless, Macros, LOLBins, and malicious scripts

### Endpoint Detection & Response

Detection & investigation of advanced threats on the endpoints

### User Behavior Analytics

Detection and prevention of attacks that involve the compromising of user accounts

### Deception

Planting fake passwords, data files, configurations, and network connections to lure attackers to reveal their presence

### Network Analytics

Prevention and detection of network-based attacks

### Response Orchestration

Manual and automated remediation actions for files, users, host, and network

# CONSOLIDATED, COMPREHENSIVE PROTECTION

**VT Cyber** provides a wide set of remediation tools to fully recover from attacks by correlating users, files, network traffic, and host activities with a complete set of threat prevention and detection tools joined by pre-set and custom auto-remediation policies for post-compromise activity.

### User

Remediation Action:
- Disparate Point Coverage
- Overly Complicated Systems
- Hard Deployment

### File

Remediation Action:
- Delete
- Quarantine
- Kill Process

### Host

Remediation Action:
- Isolate
- Shut Down
- Restart
- Change IP
- Disable all NICs
- Run Command
- Run File
- Delete Service
- Disable Service
- Delete Schedule Task
- Disable Schedule Task

### Network

Remediation Action:
- Block Traffic
- DNS Remediation
